

Maximizing Hydration, Minimizing Waste

For more than a decade, Elkay has been on a mission to reduce plastic bottle waste by manufacturing innovative and eco-friendly products. One million bottle filling stations later, Elkay has helped save more than 40 billion plastic bottles through commercial solutions alone. Discover how our award-winning ezH2O® bottle filling station and the first-ever built-in water dispenser minimize plastic dependency and make hydrating easier.

More than
40 billion
plastic bottles
saved to date!

- Units save plastic bottles from going into landfills

- Touchless, sensor activation for easy, hygienic use

- Filters certified to NSF standards to reduce lead and other contaminants

- Auto shut off helps prevent accidental spills

ezH2O Bottle Filling Stations

The widely recognized product found in airports, schools and other public spaces.

-  Laminar flow for smooth, quick filling with minimal splashing.
-  Enhanced units use an LED light, which has a long lifespan, uses less voltage and emits almost no heat or UV.
-  Green cooler combos include water-efficient bubbler and refrigeration that can be powered off to save energy when not in use.

ezH2O Liv® Pro Built-in Water Dispensers

Sleek and seamless design fits right into the wall of your favorite room, office space and more.

-  High-capacity filters provide cleaner, healthier water – longer.
-  Safety lock prevents unsupervised, inefficient use of water.
-  Convenient, healthy hydration beyond the kitchen.
